Unstabile
by Dave Brill © 2010
a moveable six unit construction

Use 15cm squares
TANT paper works well

In any arrangement, the construction has a monumental quality, reminiscent of Alexander Calder’s *Stabiles* http://calder.org/work/category/monumental/20

Mark the centre of the side with a short valley fold
Dotted lines show the position of the next unit

Ensure the second unit slides smoothly within the first

Continue with the remaining units to complete the construction

How to connect two units

Make six units

Crease firmly, open and refold, ensuring the tabs will easily flex forwards and backwards
carefully side apart two opposite units

Slide four adjacent units together then carefully collapse the construction flat.
